MESSAGE FROM THE RECTOR

Boldly proactive. Throughout 2019–2020, our University community has demonstrated how quickly and effectively we can adapt to the big challenges facing our world. Together, we have made great strides. The members of our University are creative and inspiring leaders, whether they are here to study, teach, do research, or work in another capacity on campus. I am proud of their resilience and ability to transform our University. With the help of generous donors and outstanding volunteers, they play an invaluable role in transforming our society at many different levels.

Rector,
Sophie D'Amours

ULaval

Human perspectives

ONE OF OUR 1,650 PROFESSORS

PAMPA DEY PROFESSOR OF NOTE

India native Pampa Dey is a sustainable structures expert and a leading figure in the new generation of researchers exploring innovative design and maintenance solution for aluminum structures.

“Université Laval encourages innovation, providing a positive environment that’s essential for shaping top quality talent. Its commitment to building a diverse community has allowed a non-French speaking professor like me to acquire the French skills I needed to fully immerse myself in the community.”

ONE OF OUR 9,500 STAFF MEMBERS

STEFANO BIONDO EMPLOYEE IN THE KNOW

Stefano Biondo is a map librarian and co-lead (with Benoît Lalonde and Hicham El Hachemi) in creating a dynamic map tracing the evolution of COVID-19 which has been consulted more than 700,000 times in Québec.

“From my first experience at the Université Laval library in 2002, I knew that the energy, expertise, leadership, and openness of the ULaval community would be instrumental in helping me develop collaborative projects that harness the power of information.”

ONE OF OUR THOUSANDS OF TOP RESEARCHERS

CAROLINE DUCHAINE DEDICATED PROFESSOR

Caroline Duchaine is a microbiology researcher and international expert in the propagation of antibiotic resistance by airborne microbes.

“For me, Université Laval is both my foundation and my future. It’s where I began my scientific journey and where I continue to grow both professionally and personally to this day.”

ONE OF OUR 45,000 STUDENTS

SAMUEL LAMHAMEDI ELITE ATHLETE

As a top varsity athlete who has skied in the Olympics and an actuarial and computer science student, Samuel Lamhamed is something of a renaissance man.

“Throughout my university studies, I’ve developed and grown both as a skier on an outstanding ski team and as a student at one of the best actuarial schools around. Thanks to the tools I’ve been given and the understanding people I’ve met along the way, I’ve won medals and passed my professional exams while earning my degree at Université Laval.”

ONE OF OUR 319,000 GRADUATES

ANDRÉE-ANN ADAM NEXT-GENERATION ENTREPRENEUR

Andrée-Ann Adam, co-founder with her partner Jean-Philippe Côté of a Québec company specializing in oral and dental health for animals, is a job creator and a shining example of the University entrepreneurship ecosystem.

“Quality scientific research, my research supervisor’s open-minded approach, and the entrepreneurial support I got from Université Laval allowed me to start my own business, Animora, to improve the health and well-being of pets.”

ONE OF OUR 18,303 UNIVERSITÉ LAVAL DONORS

JACQUES DESLAURIERS COMMITTED PHILANTHROPIST

Jacques Deslauriers is an officer of the Rector’s Circle, a retired professor, a law enthusiast, and one of Université Laval’s biggest donors.

“I support the Louis-Philippe-Pigeon Chair on Legal Writing because I believe clear drafting of legislation and regulations is essential to ensuring fair and equitable justice. Legal clarity nurtures trust in our institutions. After all, ignorance of the law is no excuse, but you also have to understand it!”

Only at ULaval

CREATION OF THE INSTITUTE INTELLIGENCE AND DATA

The Institute Intelligence and Data brings together top-level experts in artificial intelligence and data valorization. Its mission? To help establish Québec as a major international player in the field.

RECORD FUNDING FOR EMERGING BUSINESSES

A record \$4.4 million in funding was awarded to emerging businesses supported by Entrepreneuriat Laval. This incubator has gained international attention for winning numerous prizes and awards.

A UNIVERSITY MAKING AN IMPACT

Université Laval is ranked 41st in the world according to Times Higher Education Impact Ranking, which evaluates universities for their impact and ability to effect significant change in the world. We are the top Québec university in this ranking.

ULaval

Experience

Projects, internships, simulations, and explorations: Université Laval offers a unique work, research, and study ecosystem with strong community ties and an international focus. Below are some of the remarkable human and innovative achievements that reflect the vital significance of our University community.

PUZZLES AND MANDALAS TO CLEAR THE MIND

La Terrasse Mon équilibre UL is a mobile relaxation and conversation space that can be set up in different campus buildings. With puzzles and mandalas, it provides a much-needed haven for people to take a timeout and rebalance. This initiative is designed to help people reconnect with themselves and others and raise awareness on campus about the importance of taking care of one's physical and psychological health.

ONLINE THESIS DEFENCE

Over 60 doctoral students defended their theses online in spring 2020—a first! A nimble and responsive team was able to implement a method allowing students to defend their theses virtually before a jury. Inspired by this unique solution, other universities soon followed suit. The campus shutdown did not stop PhD students from completing this vital step in their academic careers.

LEMMINGS IN THE SNOW

Students from different backgrounds learned how to work together and share their knowledge to capture the first video recordings of lemmings in the snow. This recording system adapted to the dark and extreme northern conditions provides new insight into the biology of this little rodent at the base of the Arctic food chain.

ART ON FOOT

More than 40 works of public art are scattered across the campus. To make them easier to enjoy, the Library created the DéambUL mobile app. It's an original way for the community to get to know its artistic treasures and take part in Québec City's vibrant cultural scene.

A TRAINER IN YOUR LIVING ROOM

Two qualified trainers with an appetite for action took it upon themselves to offer online fitness and yoga classes to some 15,000 PEPS members during the lockdown. The initiative was a way to stay in contact with the community and encourage them to stay active. The first sessions were so popular that they paved the way for other similar activities.

AN INSPIRING INTERNSHIP

Thanks in part to the generosity of donors, soprano Jessica Latouche was able to participate in the Académie internationale de musique et de danse du Domaine Forget. The two-week internship, which she describes as “simply extraordinary,” gave her the chance to hone her craft in an enchanting setting as inspiring as it is peaceful.

LABORATORIES THAT MAKE A DIFFERENCE

Thanks to the culture of giving at Université Laval, future dentists have access to ultramodern labs. David Lafortune-Brunet, a fourth-year dentistry student, says that this state-of-the-art preclinical environment where students can work on pretend patients makes the learning environment that much “more stimulating and enjoyable.”

THE FUTURE OF THE RURAL HOSPITAL

A living health laboratory in Charlevoix is making it possible to solve today's problems and imagine the rural hospital of tomorrow. Professor and physician Richard Fleet oversees a team of students who listen to the population's needs and seek out innovative solutions to promote sustainable health in rural areas.

ULaval

Engagement

Members of the ULaval community are deeply committed to the big issues facing society and the world. Through innovation. Through a courageous approach that is sincere, sustainable, and community-focused. Read on for remarkable examples of what Université Laval's dedicated and hard-working ambassadors are doing for the benefit of the community at large.

JOINING FORCES WITH UNIC

All around the world, the student community is mobilizing in the fight against climate change. The launch of the International Student Network on Climate – UniC reflects their desire to join forces and share good ideas. The network, the first of its kind in the global academic community, is currently planning the first UniC Summit in July 2021.

REACHING OUT

Well-known activist Michèle Audette was named senior advisor on indigenous reconciliation and education. This new position was created as a way to reach out to Indigenous communities. The goal is to forge and strengthen ties, adapt educational offerings, and help Indigenous students succeed.

DRUG COMBINATIONS

Taking multiple drugs at the same time makes calculating the benefits and disadvantages of medications very complicated. A team of 14 researchers is using artificial intelligence to gain a better understanding of this issue. The new drug combinations that emerge will be aimed at improving the overall health of seniors.

UNDERSTANDING RESISTANCE TO HEALTH GUIDELINES

Using artificial intelligence, researcher Ève Dubé analyzed thousands of social media comments in real time during the COVID-19 pandemic. Her study aims to gain insight into why some people resist following public health recommendations and find ways to counter online disinformation.

PREPARING FOR THE END OF THE CRISIS

Some 450 people took part in the 7 free webinars in the Catalyse series presented in cooperation with Le Soleil. With Québec in lockdown and facing economic uncertainty, members of the ULaval faculty put their expertise to work for the community to prepare for the end of the crisis, addressing issues such as telework, psychological health, kickstarting sales, and responsible communication.

KEEPING AN EYE ON ENERGY CONSUMPTION

A big team is mobilizing to achieve ambitious targets for reducing energy consumption on campus. Staff and students are working together to continuously monitor our energy consumption. Their watchful eyes are helping us find and implement solutions as soon as issues are identified.

DELVING INTO HERITAGE

The artifacts from the Cartier-Roberval archeological site in Québec City will be studied and presented by Unité mixte de recherche (UMR) Capitales et patrimoines. Created by Professor Habib Saidi in partnership with Commission de la capitale nationale du Québec, this multidisciplinary joint research unit will help meet regional needs and promote heritage awareness among the population.

ENCOURAGING PEOPLE TO GIVE BACK

A firm believer in the potential of altruism and philanthropy, Université Laval has launched a new social engagement vision. The goal is to shine a light on community members who are already giving back and inspire others find new ways to do their part. The vision can help nurture efforts to rebuild after the pandemic.

ULaval Excellence

Efficient, modern, and network driven, Université Laval pursues excellence in all aspects of its mission. We invite top talents to pursue their passion and encourage leaders to leave their mark on society. Get to know some of our brightest stars in research and education.

MAKING THE MOST OF PANDEMIC DOWNTIME

A webinar on impacted teeth attracted a record number of dentists and dental hygienists. With their dental practices temporarily shuttered, 1,340 people from across Québec took advantage of the enforced break to sign up for a virtual three-hour professional development session. Given the sky-high demand, a second session was scheduled soon after.

EATING UNDER THE INFLUENCE

Genetics, behaviours, our environment—there are a multitude of factors that influence the way we eat. The new NUTRISS Centre - Nutrition, health and society brings together 45 Université Laval researchers to explore these questions. This centre uses a big data to develop unique holistic approaches to individual and population health.

PUTTING BLOOD WASTE TO GOOD USE

Professor Laurent Bazinet and his team designed a process for isolating natural meat preservatives in pig's blood. Finding a use for this low-value waste product is a great example of the circular economy the biofood industry is striving toward.

VIP VISITORS AT PEPS

Fresh off their NBA championship win, the Toronto Raptors decided to hold their 2019–2020 season training camp at our very own PEPS sports complex. It was a big first for Québec City, and all eyes from across the nation were on us for four days. The closing game of the training camp drew a capacity crowd of 3,500.

GIVING NEW MEANING TO RESEARCH

Rachelle Séguin and Andrea Gomez leveraged the knowledge they acquired in their graduate studies to launch their highly successful scientific company OMY Laboratoires. Specializing in customized, natural skin care and cosmetic products, the company brings together a multidisciplinary team and gives new meaning to what started as a student research project.

JUSTICE FOR ALL

The International Criminal and Humanitarian Law Clinic was awarded the Access to Justice for All award at the 2019 United Nations Gala. This important distinction recognizes the sustained efforts by members of the clinic to promote the values of the United Nations in the Québec City metropolitan community.

SHEDDING LIGHT ON ADHD

Four faculties worked together to create an open-access online training program on ADHD (attention deficit hyperactivity disorder) that has reached 22,000 people to date. Parents and school staff have been very satisfied with the training, which gives them tools to support their children and students in their daily lives.

READY TO TAKE ACTION?

Are Quebecers ready to take action on climate change? Pénélope Daignault and Valériane Champagne St-Arnaud are the codirectors of an original new research project—Baromètre de l'action climatique au Québec—that provides fresh insight on people's willingness to change their behaviours to take action on climate change. A useful tool for social communications.

ULaval's response to COVID-19

\$5.5 million

Total funding awarded by the Canadian Institutes of Health Research to eight professors to understand, document, and combat the virus.

515

The number of students and staff members repatriated to Canada amid the pandemic to ensure their continued safety and well-being.

\$1.2 million

Amount raised and distributed to students experiencing financial hardship at the height of the pandemic.

ULaval

Recognition

Get to know the people who've received honorary doctorates from Université Laval, the university's highest honour.

2020

Rebecca Belmore
Contemporary Artist
Honorary Doctorate in Visual and Media Arts

Lucien Bouchard
Lawyer, Politician, and Former Premier of Québec (1996-2001)
Honorary Doctorate in Law

Janice J. Eng
Professor, University of British Columbia (UBC)
Honorary Doctorate in Rehabilitation Science

Temple Grandin
Professor of Animal Science, Colorado State University (CSU)
Honorary Doctorate in Animal Science

Maria Klawe
President, Harvey Mudd College (HMC)
Honorary Doctorate in Computer Science

Marie-Nicole Lemieux
Opera Singer
Honorary Doctorate in Music

Davianna Pōmaika'i McGregor
Professor, University of Hawaii at Manoa
Honorary Doctorate in Social Sciences

Romeo Saganash
Cree Leader and Indigenous Rights Advocate
Honorary Doctorate in Law

Ronald G. Sultana
Professor, University of Malta
Honorary Doctorate in Counselling

Gisèle Turcot
Founder of the Femmes et Ministères network
Honorary Doctorate in Religious Studies

Sheila Watt-Cloutier
Québec Inuit Environmental Activist
Honorary University Doctorate

ULaval

Recognition

The best in the world. Our personal favourites. Or simply those who inspire us and help us dream. The people on our list hail from a variety of backgrounds. A mix of established leaders and flag bearers for emerging talent, they exemplify the pride of belonging to the Université Laval community.

CAROLE DESPRÉS
Uniting the world

As the organizers of the first International Association of People-Environment Studies (IAPS) conference to be held in North America, architecture professor Carole Després and her team worked incredibly hard to transform this major conference into a virtual event. She received the Soutien à l'organisation de congrès internationaux award from the Ambassadors' Club and Fonds de recherche du Québec.

JEAN-FRANÇOIS SÉNÉCHAL
Teaching through play

Lecturer Jean-François Sénéchal turned to video games for inspiration when creating his Business Ethics distance learning course. Engineering students gain insight into ethics issues through a fun and interactive program. The course earned Jean-François the 2019-2020 Minister's Award for Higher Education in the "Synchronous, Hybrid, and HyFlex" category.

FLORE SERGEANT
Bringing science to people

Flore Sergeant, a PhD student in Earth Sciences, is one of the finalists in the My Northern Project science popularization contest. Her compelling video on the thawing of the permafrost also earned her the public's choice award after racking up 1,500 reactions on social media. Flore Sergeant rose to the challenge of generating significant visibility for her high-level research.

PHILIPPE ARCHAMBAULT
The scientist behind a major breakthrough

Working with scientists from nine countries, Professor Philippe Archambault published an article asserting that 95% of the 15,000 species of fish in our oceans are connected within three degrees of separation. One of Québec Science magazine's discoveries of the year, this model demonstrates how water temperature and salinity levels can have a major impact on different species.

NOÉMIE CHAGNON-LESSARD
Rising star

Noémie Chagnon-Lessard, named best young researcher in the field of energy efficiency at the Young Energy Researchers Conference, loves to push the limits of mechanical engineering. Her work on a new method for designating organic Rankine cycles to recycle industrial waste heat is what earned her this award from the Upper Austrian Ministry of Economy.

NORMAND VOYER
Chemistry demystified

Professor Normand Voyer is a well-known chemist and science poplizer who received the ACFAS Urgel-Archambault Prize. He contributed to the discovery of new bioactive molecules from northern regions (plants, lichens, microorganisms) and is an active promoter of science among the general public and young people.

People who are transforming our world

As invaluable partners in the University's mission, faithful allies of teaching and research, and standard bearers for generosity, our donors and the people they help remind us every day of the true meaning of philanthropy. Let's get to know some of them.

AIMÉE DIOP

Aimée Diop, who hails from Senegal, brings her passion and human values to the many environment-related projects she has on the go. The master's student in environmental biogeosciences has faced many challenges since moving to Québec in 2019. The grant she received from the COVID emergency fund helped her weather this difficult period and pursue her academic goals.

GILBERT TARDIF

At age 93, Gilbert Tardif saw one of the loveliest conference rooms on campus named in his honour. Passionate about wood, he has made Maibec a North American leader in exterior wood siding. For the past 40 years, he has been active in the community and giving back to his alma mater, which is a key player in Québec's forestry sector

PHILIP OLIGNY

Philip Oligny, a master's student in design, founded Kartus, a business dedicated to helping people with reduced mobility overcome their isolation. The company's state-of-the-art wheelchairs allow people in this community to take part in races and other outdoor activities. The young man gives back to his community by volunteering to help students in pursuing a bachelor's degree in product design.

Taking action for sustainable development

35,211

Number of students registered in sustainable development courses in 2019–2020

1.7 million

Public transit trips taken with the University bus pass in fall 2019.

0 tons

Net emissions of Scope 1 and Scope 2 GHGs. Zero carbon footprint for five straight years

[See the contributions to sustainable development objectives](#)

Some benchmarks

Total student body

Université Laval is home to Québec's 2nd largest student community, which grew by nearly 5% in fall 2020, despite COVID-19.

Diplomas and certificates awarded

Université Laval is among Canada's leading universities for the number of diplomas and certificates awarded. More than 80% of students who start a bachelor's degree complete their program, meaning we have the 5th highest graduation rate in the country.

Some benchmarks

According to the most recent data, Université Laval ranks 7th among Canadian universities in terms of research revenue.

Cross-sector collaborative publications

Université Laval has one of the highest cross-sector research publication rates among universities in the U15 (Canada's major research universities). Our researchers excel in collaborating with the private, hospital, and government sectors.

Student satisfaction rating

Two North American surveys confirm that students' overall satisfaction with the education offered at Université Laval is higher than the average for other Canadian universities. The most recent Maclean's rating ranks Université Laval first in this regard among U15 universities.

Greenhouse gas emissions

Université Laval, sustainable development leader The first voluntarily carbon neutral university in Canada (2015), STARS gold rating (2019), 11th in North America according to the 2020 Sierra Schools Rankings, and 8th worldwide for its efforts to fight climate change according to the 2020 Times Higher Education Impact Rankings.

[To view all Benchmark](#)

ULaval

Ongoing efforts

Université Laval created a bold strategic plan to raise our profile and meet the expectations of society and future generations. The University community enthusiastically answered the call. These stories and achievements inspire and motivate us. Our third community report is a reflection of our desire to shine a light on all the talent and knowledge within the University. And it's one more way for us to say thank you.

Generous support for ULaval

18,303

Generous donors

\$12 million

Awarded in scholarships and bursaries

\$12 million

Paid in support of research

[See the Foundation's annual report](#)

ULaval

Financial statements

As a modern, transparent institution, Université Laval makes its financial statements accessible to the entire University community.

In recent years, the correlation between disposable income and expenses incurred has been maintained.

The proportion of investments in each category has been maintained, particularly for information technology.

[See the full financial statements](#)

ULaval

Governance

BOARD OF DIRECTORS

The Board of Directors is an independent body that ensures the University is managed in exemplary fashion. It approves and supports the University's strategic priorities and gives major projects the green light.

Voting members (Section 71 of the Statutes)	
Rector	Sophie D'Amours*
Executive Vice Rector and Vice Rector of Academic and Student Affairs	Robert Beauregard*
Dean	François Gélneau*
Professors (3)	Olivier Barbier Chantale Simard Sophie Verville
Lecturer	Christine Gauthier
Graduate student	Ibrahima Massagninni Kone
Undergraduate students (2)	Marie-Lyne Bourque Laurence Vaillancourt
Department manager	Denis Beaudoin
Professional administrative staff	Najat Aattouri
Administrative support staff	Mario Duclos
